

# Selling Cutting Enabling Works

## THE PROJECT

Selling Cutting, part of BAM's CP6 earthworks framework. AMI Projects was contracted to carry out various tasks to allow Bam's to complete all stabilisation works.

Site surveys were carried out to define project methods for the main contracted works.

Project Value

**£80K**

Project Started

**Dec  
2022**

Project Ended

**Jan  
2023**

Client

**Bam**

## THE DELIVERABLES

- AMI Projects completed on-site assessments/surveys to confirm protection methods.
- Booking and managing of all outages for the main works and supply of HV and S&T staff.
- Cable protection and relocation of HV and S&T cables.
- Cable reinstatement on completion of main works.
- Conductor rail relocation and reinstatement to allow plant movement throughout the work site.
- New Containment routes were installed for HV and S&T cables.

## CHALLENGES & SOLUTIONS

The works had to take place under planned possession access to our client's programme. AMI Projects fully integrated our team with our clients to ensure that possession access was planned in-line with our work to be completed. our planning team used their extensive knowledge to provide the project with skilled and competent resources to deliver the work safely and to the client's programme.
